Press Release

Medical Office Becomes First "Hot Spot" Dermatology Clinic on Maui to Offer Wi-Fi Internet Connection for Patients

Aloha Dermatology of Kahului became the first dermatology clinic on Maui to offer a WiFi internet "Hot Spot" connection space for patients in its reception area on June 8, 2009.

Kahului, HI, June 8, 2009: "To the best of our knowledge, we are the first dermatology office on Maui, and the first medical clinics to offer such a free service to our patients. Often times patients are accompanied by spouses, siblings, children, friends, etc. We try to make the reception area as pleasant as possible for them so this was a natural evolution in the high quality environment we desire to provide for our patients which also includes a full compliment of reading material and toys for the children.

Based on our survey responses in the past, as soon as the word gets out, it will be very popular, both for patients, (if we happen to be running a few minutes behind), or for any guests who are waiting for them" say Dr. Micki Ly, M.D., Clinic Medical Director.

Dr. Ly is Board Certified in Dermatology and is a Member of the American Academy of Dermatology and Fellow Member the Hawaii Dermatological Society.
